

Your Cats Are Members Of Your Family, So We Treat Them Like They're Members Of Ours.

For the life and health of your cat, an ounce of prevention can make all the difference in the world. Proper vaccination and testing is vital to any long-term health program. We offer kitten, adult, and senior cat tailored early detection programs.

These individualized programs vary with your cat's age, weight, breed, lifestyle and travel habits, and are budget-friendly with our monthly **Petly membership!**

A wealth of information about your cat can be determined with just a few drops of blood. Obtaining a "baseline" of organ function can be an invaluable reference. For senior patients we can monitor organ function, check responses to medications and therapies, and detect disease before symptoms appear. From the start of your cat's life, through the senior years, you can count on us to provide excellent life-long medical care.

"This is the only place I'll ever take my cat!!! Everyone was really nice and caring. They made me feel comfortable and they took very good care of my little girl. Couldn't have been more pleased, and Gaia is all better now. Thank you all!"

- Siren P. (Google review)

If Your Cat Requires Surgery

We offer the most advanced surgical techniques and technology. All patients are carefully screened for safety, and anesthetics are specifically tailored to your cat. Surgical testing, fully-trained veterinary and technical staff, board certified surgeon available for consultation, advanced sterilization techniques, heated surgery surfaces for greater comfort, ECG, blood pressure, respiratory and oxygen saturation monitors, the safest, most efficient state-of-the-art procedures for your cat and intensive after surgery care.

Dental Care

Regular professional dental cleaning is important. We use modern and safe ultrasound to clean each tooth thoroughly – above and below the gum line. Dental technicians polish the teeth to create a smooth, lustrous tooth surface more resistant to plaque buildup.

Fluoride treatments help strengthen enamel and reduce tooth sensitivity. Advanced dentistry is also available with dental x-rays and specialized equipment.

Welcome to The Cat Doctors

You can be assured that every aspect of your cat's needs will be taken care of with the highest level of compassionate veterinary care. Everything at The Cat Doctors has been specifically designed for the care of cats and only cats.

Our exam rooms are designed to make your cat feel more at home than at the veterinarian. They are smaller than the rooms designed for dogs and are equipped with home-style furnishings rather than steel tables. Our goal is to keep your cat as calm and comfortable as possible.

Outstanding Care for Every Cat and Every Client, Every Day

Dr. Welborn and Dr. Lassett are board certified in feline practice. Drs. Simon, Savarese, Bishai, and Welch together have over 40 years of experience caring for cats. Our hospital has been

accredited by the **American Animal Hospital Association**, which demonstrates our commitment to the highest standards of veterinary care.

Cat Friendly Practice

A Cat Friendly Practice creates a safe, low-stress atmosphere for our feline patients, while providing the highest

quality standard of care. Our veterinary team has advanced training to perform the health care that cats specifically require with the special attention they need.

Our practice has made the commitment to you and your cat by becoming a Cat Friendly Practice. To learn more go to www.catvets.com.

Express Services

In a hurry? We offer express check in, express medication refills, and express check out services! Call us at the Cat Doctors and let us know what you need.

"I have been taking my cats to the Cat Doctors for over a decade. I am so appreciative of the love, care and above and beyond service provided by every single member of the staff. I am a forever client. They have seen me through good times and sad times and I am lucky to have them as part of our paw family."
